» X-Guard[®] Fitting for horizontal panel

X-Guard[®] Fitting for horizontal panel

A number of brackets are available for X-Guard as accessories. These allow simple and quick attachment of panels to posts.

The quick fittings has a top and a bottom attachment. The top fitting is a simple click-on fitting which can be fitted to the three sides of the post. The click-on function means simple and above all quick fitting. A fitter is only required to fit mesh panels to X-Guard machine guards.

The lower fitting acts as a guide and guides the panel into the correct position. The panel is simply clicked into place in the top bracket, when it is in place.

Fitting

- Free positioning
- 1-pack
